

## Mona Large PC938

The Mona collection is based on the concept of penetrating forms. The light source boldly traverses the ample volume of smooth handblown glass to reveal the thrilling tension inherent in the design. The collection's essence, however, lies in its unconventional construction and refined combination of materials. It also boasts dimmable tubular LED light sources, developed by BROKIS, each with a different colour temperature. The entire Mona family has been technologically improved with innovative connectors and the replacement of the wood components with metal ones. These improvements make it easier to change out the light source and clean the lights. The wall variant is dimmable via an integrated dimmer in the lower part of the metal fixture, and the table variant offers touch dimming. The collection comprises several sizes (S, M, L, XL) and various types of lights (pendant, floor, table, wall).
