

OLYMPIA MINI DIM PUSH 3000K W

Olympia is a ceiling recessed LED light fitting for general lighting functions. Its geometry represents an evolution in the downlight concept as it is longitudinal in shape rather than the normal circular shape. This feature opens up a whole new range of possibility for architecture and interior design professionals. Its shape permits applying optical effects that enhance the perception of width or length in a space, emphasise itineraries, highlight important features or have an impact on the pace of transit through the room.

Brand

Arkoslight
